

TECHNICAL TESTS

Dynamic Picture Gallery

(A real test from “LINKA”)

Instructions:

- The purpose of this test is to generate a dynamic image gallery using the "https://unsplash.com" API.
- The AJAX call must be made with JQuery.
- The image load should be 10 by 10 when scrolling down.
- Use of Bootstrap ready to correctly display images on different types of screen.
- Use of the library "lazyload" with preload and with the possibility to expand each one with a gallery of images in "fancybox".
- Two different types of Google Fonts combined to improve the result at the top, which should be the title and this text.

Good Luck!
